COSHH ASSESSMENT

CUSTOMER'S NAME:

ADDRESS:

ORDER REF:

I have identified a need to use a chemical product at the premise above to control a pest bird species.

It is intended to use the Bird Free product.

The Company has consulted the Bird Free Instruction Manual and the product safety data sheet to consider the product hazard and any workplace exposure limits (set by EH40/2005) in relation to the proposed use.

Summary conclusions and other data.

Activity

Placing Bird Free product in trays in specific areas within the premise.

Appropriate Regulations

Health & Safety at Work Act 1974.

COSHH Regulations.

Persons at risk

Operative dispensing Bird Free product

On site Company employees

Bystanders

Hazard identification

None of the ingredients are listed in EH40/2005

SDS indicates that Bird Free is not hazard classified.

Identification and control of risk

Contact with skin and eyes might produce irritation effects.

A trained operative will apply product and secure trays in place in the premise.

The working area will be arranged so that other persons are excluded during the activity.

A safe system of work will be adopted.

This COSHH assessment concludes that risks to the health of operators and persons at the treatment site can be adequately controlled by using the product indicated, adhering to label instructions, and using PPE when necessary as indicated on the SDS.

Sketch or list specific areas to be treated at the customer's premise.

A sheet showing precautions to be observed and a contact telephone number has been/will be left with the client.

This COSHH assessment does not cover other workplace risks and their assessment as required by legislation.
