

Installation of 小島 *Bird Free*
at Allios Paint & Varnish Factory, Provence, France, 12 August 2013.

Allios' 5,000-square-metre factory in Villeneuve-Loubet, Provence.

Pigeons were nesting and roosting in many of the high-level cable trays inside the factory.

On 12 August 2013, the cable trays of were cleaned of nesting material and faeces, and dishes of 小島 *Bird Free* were applied to the infested areas.

Testimonial

On September 13, 2013, one month after installation, M. Cyril Fernandez, Service Quality - Environment, Allios Villeneuve-Loubet, commented:

"Our acrylic paint factory was gradually invaded by pigeons. These became accustomed to nest inside the factory. The main building consists of a steel frame with a multitude of cable trays. It's an ideal nesting place for pigeons. We encountered the following problems:

- Quality of finished products due to droppings on paint cans
- Quality problems due to droppings in manufacturing tanks
- Droppings on machinery, work surfaces, etc
- Worker dissatisfaction.

"We were advised to install *Bird Free*. The results have been very satisfactory since installation in August 2013. "
