

Application of 小島 *Bird Free* to the interior of Augustus Martin's warehouse, Bromley-by-Bow, London, February 2016.

Pigeons had been nesting in the sheltered corners at the top of the warehouse for many years. Sixteen nests were removed from these corners.

Severe fouling in the corners of the warehouse had resulted from the long-standing nesting sites above.

All sites from which nests had been removed were cleaned, as were the lateral beams near the nesting sites, on which the pigeons had been perching during the daytime. These were treated with 小島 *Bird Free*, as shown above.

The above photos show dishes of 小島 *Bird Free* fitted into the corners of the warehouse from which nests were removed. In total, approximately 1,200 dishes were fitted.

Testimonial

On 4 May 2016, Stuart Callison, Facilities Manager at Augustus Martin commented:

“Pigeons had been nesting inside our warehouse for a number of years, and used to create an unsightly mess. The amount of droppings on the goods stored inside the warehouse had become a serious problem. Since *Bird Free* was applied to the nesting sites the pigeons have not returned, and our problem has been solved.”
